

Environmental Cleaning

All Purpose Cleaner: 1 oz. per gallon of water
(One 32 oz. bottle can yield 16 - 32 qts. depending on dilution.)

Versatile and Multipurpose Uses

The following list and directions are intended only as a guide to the many uses of **KLEEN FREE**. Individual needs may differ. Start with the suggested mix strength, and adjust to your needs. **ALWAYS TEST** in an inconspicuous area before using, and **TEST** for color fastness.

GENERAL DIRECTIONS: For general cleaning, simply spray on and wipe off. In some instances, waiting 1-2 minutes before wiping off is more effective. See chart for specific uses and strength. When a use is not specifically mentioned, follow the general instructions, and test in an inconspicuous place.

CONCENTRATED MIX USES: Apply **KLEEN FREE** - allow time to work then wipe, scrape or brush clean.

DRAINS/GREASE TRAPS: 1-2 oz. allow to sit, then pour in hot water.

TOILET BOWL: Add 1 oz. to bowl and allow to sit for 30 minutes, brush and flush.

STRONG MIX USES: 2 oz. per gallon. 2 tbsp. per 24 oz. bottle. Spray, wait several minutes then wipe clean with a brush or rough towel. Repeat if necessary.

GENERAL MIX USES: 1 ounce per gallon or 1 tbsp. per 24 oz. in spray bottle. Spray or wash and wipe off, or wait 1-2 minutes, then wipe clean.

STAINS and ODORS on FABRIC and UPHOLSTERY: spray and allow time for enzymes to work. Blot with a rough towel or rinse with water. For stubborn stains, use a stronger mixture and soak overnight.

CARPET CLEANING: for recent stains, chewing gum, grease, tar, etc., and odors, spray with **KLEEN FREE**, allow time to work, then blot clean with a rough towel. For older stains and odors, vacuum the area, spray and allow time for enzyme to work, then blot with a rough towel. Stubborn stains and odors may need more than 1 treatment, or a slightly stronger mix and adding 1/2 to 1 cup of borax to the gallon produces an even better result. When using a carpet cleaning machine, use warm or hot water and **KLEEN FREE**.

PET STAINS AND ODORS: to remove animal stains and odors from carpets, furniture, either spot clean by spraying with **KLEEN FREE** and blotting dry with a terry towel, or clean carpets as above.

KENNELS/STABLES: 1 oz. per gallon. To deodorize kennel runs, patios, stables, trailers, remove animals and spray with a garden hose sprayer

PET ODORS/DANDER: 2 oz. per 1 gallon. Spray coat or fur of pet (avoid eyes).

WASHING MACHINE: 1 - 2 oz. to wash cycle, use in place of bleach to brighten and freshen.

LIGHT MIX USES: 1/2 ounce per gallon. If glass or mirror streak or smear, dilute mix with additional water. For plants and bushes use a spray bottle or a garden hose sprayer.

**BED BUGS, HEAD LICE, SCABIES,
FLEAS, MITES AND ALL TYPES OF
PLANT AND HOUSE PESTS**

**CHEMICAL & PESTICIDE FREE, NON-TOXIC,
SAFE FOR CHILDREN, PETS & THE ENVIRONMENT**

Removing Scabies Safely

Directions for adults and children with Scabies

Dilute enzyme product using 1 oz. with 8 oz. of water. Apply directly on affected area with finger or swab. Massage diluted **KLEEN FREE** onto dry skin giving special attention to areas between fingers and toes and under finger and toenails.

(NOTE: Scratching an infected area and then another non-infected area on the body can easily transfer Scabies.)

For Best Results: Take a soaking bath for the first application in the late afternoon or early evening, using 4 oz. or more of **KLEEN FREE** in a tub of warm water. Soak approximately 20 minutes. Do not wash off with bath soap. Air dry. After body is completely dry, apply diluted **KLEEN FREE** solution to problem areas. Do not rinse. Repeat entire topical application every 24 hours to insure complete coverage as directed above. Continue using until symptoms no longer persist. **Diluted solution can be used as often as needed.**

Removing Pubic Lice (Crabs)

Directions: Dilute 1 oz of **KLEEN FREE ENZYMES** with 8 oz. of water for solution.

How to use: Wet hair first, apply about an ounce of solution and work into a lather, allow to set for five minutes. Do this no less than three times. Rinse and comb out lice with luke-warm water. Product should remove pubic lice and their eggs in one treatment. Inspect, and retreat as needed. (If reinfestation occurs, this nontoxic product may be used immediately.)

Note: **KLEEN FREE** is for external use only. If contact is made with eyes, rinse thoroughly with clean cool water. Can cause eye irritation. If skin irritation or infection develops, consult your physician or dermatologist. Keep this and all cleaners out of the reach of children.

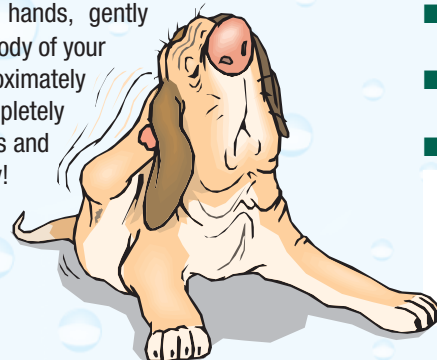

INGREDIENTS: Active Ingredients: A specially formulated broad spectrum of enzymes derived from innocuous yeast strains. FDA good grade ingredients. GRAS (FDA Generally Regarded As Safe) List Parts 184 and 186. This product is not a pesticide.

Ridding the Home of Fleas

- Steam clean or vacuum thoroughly every day for two weeks. **DILUTE KLEEN FREE ENZYMES AT A RATIO OF 1 OZ. PER 8 OZ. OF WATER.** Spray or use in a carpet cleaner on and around carpets, rugs, baseboards and floors. Kleen Free is safe to spray on furniture if needed. Rinsing or wiping with clean water may be necessary if heavy application is used.
- Carpet is the perfect flea environment! Steam clean with diluted **KLEEN FREE ENZYMES.** This will remove dried blood, carpet fibers and other debris, diluted excrement, flea larva and their silk, eggs, adults, feces and other food sources.
- Spray yards and crawl spaces with **Kleen Free.** Use a hose-end sprayer and spray the yard (1 oz. per 8 oz. of water) with Kleen Free to control outside flea sources. Note: 90% of opossums in urban Midwest areas are infected with fleas. Hot summer temperatures (especially when dry) normally prevent fleas from developing. Only shady and moist areas need to be sprayed.
- Other alternatives: Sprinkle baking soda/borax, or gardener's lime. Repeat as needed.

How to Use for Pets

- Spray or bathe pets with (1 oz. per 8 oz. of water) **KLEEN FREE**, and wash bedding weekly in **KLEEN FREE** and Borax.
- **FOR FLEAS & TICKS:** Stand your pet in a container and soak them with warm water. Dilute 1 oz. of **KLEEN FREE** into 7 oz. of water to make pet shampoo. Wet hair around neck and hind quarters first to prevent fleas traveling to these areas. Then wet down remainder of pet's coat. **Take care to avoid eyes.**
- Using a brush or your hands, gently massage over the entire body of your pet and leave on for approximately 3 minutes. Rinse completely with warm water and fleas and ticks will be washed away!

How to Treat Bedbugs

Dilute nontoxic **KLEEN FREE ENZYME** by using **1 OZ. PER 8 OZ. OF WATER IN A SPRAY BOTTLE.** Apply a light mist to the entire mattress. Pay particular attention in spraying mattress seams, buttons and tears. Don't forget to treat the bottom of the mattress, box springs and bed frame. The objective is not the quantity of spray used, but rather the proper placement of the enzyme cleaner, get the spray to where the bedbugs are spending their off-hours.

WHERE DO THEY HIDE?

In early infestations bedbugs are found only about the tufts, seams, and folds of mattresses and daybed covers; later they spread to cracks and crevices in the bed skirts and box springs. If allowed to multiply, they establish themselves behind baseboards, window and door casings, pictures, and moldings, and in furniture, loosened wallpaper, and cracks in plaster and partitions, even clothing. Look behind pictures.

Inspect and spray along baseboards, window frames, wall paper edges, heat registers and other moldings. As it may be impossible to penetrate all hiding places immediately, control may not be immediate and bugs may be seen for several days after treatment. Spray daily for several days.

OTHER TIPS FOR BEDBUG REMOVAL

- They cannot crawl up smooth surfaces. Remove bed skirt if you have one. Coat legs of bed with light coating of Vaseline or place legs of bed in glass or plastic containers.
- After misting mattress with **KLEEN FREE** - wrap mattress in plastic.
- **IRON** your mattress - especially the edges!
- Wash and/or dry bedding, linens and towels daily if necessary.
- Use small amount (about 1/2 oz.) of **KLEEN FREE** in a Steam-Cleaner.
- Persistence in spraying daily may be necessary for several days.
- If you spray where they hide, they will not survive!
